Our signature, hand mixed, 100% pure essential oil blends are natural holistic alternatives. They aren't meant to replace a physician's treatment or prescribed

medications. Each complex blend was created to target and soothe specific issues. Our essential oil aromatherapy blends are amazingly powerful and naturally effective for ages 10 & up, with adult supervision for use by ages 10 to 12. We pride ourselves on only using 100% pure premium essential oils in all of our essential oil aromatherapy products, because many companies process their essential oils with toxic solvents, synthetic extenders & fillers, creating a poor quality and potentially dangerous product that can cause severe adverse reactions & effects. These practices and products go against our ethics, morals and mission! The 100% pure premium essential oils cost more, but we feel they are worth every penny when it comes to everyone's well-being and the handcrafting of our premium products.

Salt Therapy, also known as Speleotherapy, was developed in the mid-1800s after Polish salt miners were found to have a lower incidence of pulmonary disease.

Himalayan Sea Salt helps protect our mucous membranes, which are one of our bodies' first lines of defense against sickness. Research has proven, when inhaled, Himalayan salt prevents viruses, bacteria, germs & pollen from entering our sinuses, throat and lungs by the process of osmosis. Osmosis dehydrates the invading cells structures, resulting in the death of those invading cells.

Our products are proudly USA handcrafted with ethically & sustainably sourced premium essential oils and natural ingredients, and are always cruelty free! They are never tested on animals, only on willing humans.
